The following is an examiner's statement of reasons for allowance: Regarding independent claim 11, the prior art of record neither shows nor suggest an electric lamp comprised of, in part, a plurality of pigment particles dispersed through said organically modified silane network. said plurality of pigment particles including means for absorption characteristics absorbing a first portion of the visible light propagating through the light absorbing coating without generating a light scattering of a second portion of the visible light propagating through the light absorbing coating.

Due to their dependency, claims 12-25 are necessarily allowable.
